Chapter 383: The Fourteen Main Clones of Sung Jin-Woo

The Supervisors of the Multiverse

Even as the True Absolute One, Sung Jin-Woo maintained his presence across the multiverse through his fourteen main clones. Though each clone retained only 0.0000000000000001% of his original power, their might was incomprehensible to any being other than Sung Jin-Woo himself.

Over the eons, the clones evolved alongside their creator. They could now expand their forms to galactic sizes, their mere presence shaking the fabric of reality. While their wings numbered in the millions, they kept them folded and invisible to avoid overwhelming lesser beings.
